\*Each time you contact us, please state the Association number.

\*Clarification: This certificate does not attest that the Association meets all the requirements of the statute and the registrar, but only that as stated above, the Association submitted annual reports according to the statute and the instructions of the registrar, and there were no shortcomings found in its operation that would justify annulling the certificate.

The Registrar of Associations takes the initiative in conducting inspections during the course of the year, even after it has given a certificate of sound management. Shortcomings that will be found in the Association after the certificate is given are likely to lead to the cancellation of the certificate that was given, or to change the wording of the certificate.

It is recommended that you check on the website of the Corporate Authority – Registrar of Associations whether the certificate is in effect.

Also, you can look at the Association's reports, free of charge, on the Guidestar Website, and also inspect the Association's file, subject to payment of a fee.
